PROFESSIONAL SUMMARY

Full Stack Developer with experience building AI-powered web applications using Python, Django, React/Next.js, REST APIs, and SQL databases. Shipped production features for AI interview preparation, communication training, and coding assessment platforms with LLM integrations.

EXPERIENCE

Full Stack Developer — ElevateCareer.ai

May 2026 – Present

(Hyderabad, India) — AI-powered career development platform

- Built 5+ Coder Arena game modules — including AI Pair Debug with code execution and LLM feedback — and Communication Studio with role-based learning paths and an audio/video scoring engine (Django backend, React frontend).
- Designed XP, scoring, and leaderboard APIs powering the Coder Arena challenge system across Design Duels, Strategy Sims, and Company Gauntlet.
- Rebuilt 5+ core product surfaces (home page, user dashboard, admin panel, auth flows, marketing pages), fixing mobile responsiveness and Next.js RSC rendering issues.
- Streamlined AI voice/LLM integration in interview and debugging features via asynchronous processing and query tuning, and built Excel-to-Django content-seeding pipelines powering 3+ modules.

Backend Developer — Bhumi Tech Pvt. Ltd.

Dec 2025 – May 2026

- Developed and scaled an LMS delivering 15+ modules (departments, training materials, employee management, role-based admin dashboards) plus 10+ advanced features like quiz popups and progress tracking.
- Automated monthly management reports via email with summarized analytics and department-wise insights, reducing manual reporting effort by 70%.

Data Analytics Intern — Cognetix Technology

Jul 2025 – Dec 2025

- Processed 15k+ records and built analytics pipelines (Pandas, NumPy) and predictive models, creating dashboards that improved reporting efficiency by 35%.

Software Intern — Yhills Data Tech

Aug 2024 – Jan 2025

- Delivered SQL training (MySQL, PostgreSQL, SQLite), built Python + SQL CRUD apps, and tuned queries to cut execution time 30–40%.

Frontend Developer Intern — Luneblaze

Jan 2023 – Nov 2023

- Debugged and enhanced features for a learning platform, reducing system bugs by 20%.

PROJECTS

Unnati — Farmer Trust, Credit & Transparency Platform

Django REST, Next.js 15, PostgreSQL, TypeScript

- Built a full-stack platform with role-based dashboards (farmer, buyer, government, bank, admin) covering trust scoring, loan eligibility, marketplace, complaints, and government schemes, with a bilingual Hindi/English AI assistant (Gemini-backed, with guided fallback Q&A).

AI Writing Assistant

Django, React, REST API, JWT Authentication

- Built a full-stack AI writing assistant with a Django REST API backend, React frontend, and JWT-based authentication for secure user sessions and content generation workflows.

CineScope — Movie Rating & Review Platform

Django, MySQL, HTML, Bootstrap

- Developed a full-stack movie discovery platform (200+ users) with 15+ APIs for ratings, auth, reviews, and recommendations; boosted query performance 30% via Django ORM.

JobMail Tracker

Python, Gmail API, Google Sheets API, OAuth 2.0

- Built an intelligent job-application email tracker integrating the Gmail and Google Sheets APIs with OAuth 2.0, using smart filtering to automatically log and organize job-search emails.

TECHNICAL SKILLS

Languages: Python, SQL, C++, JavaScript, TypeScript

Backend: Django, Django REST Framework, FastAPI, REST APIs, JWT Authentication, Role-Based Access Control (RBAC)

Frontend: React, Next.js, TypeScript, Tailwind CSS, HTML, CSS, Bootstrap

Databases: PostgreSQL, MySQL, MongoDB, Redis

Libraries: Pandas, NumPy, React Query, Axios, Recharts

Dev Tools & Cloud: Git, GitHub, Docker, VS Code, Jupyter, Linux, Cloudinary

EDUCATION

B.Tech Computer Science Engineering

Aug 2022 – 2026

J.C. Bose University of Science and Technology, Faridabad

CGPA: 8.2

ACHIEVEMENTS & CERTIFICATIONS

- Solved 150+ Data Structures & Algorithms problems across LeetCode and CodeChef using Python.
- Built 10+ production modules at ElevateCareer.ai; strong understanding of system design and scalability concepts.
- Completed certifications in Python, Data Analytics, and SQL (Infosys & Udemy).
